

CST8110 - Introduction to Programming

Hybrid Activity #1 - Practicing Patterns

DUE: complete this activity by class on Tuesday September 22nd

Complete the Blackboard Hybrid Activity (Quiz/Test) called Patterns Test. You will need to have the PDF document called Programming Patterns open, as I could not re-create the figure diagrams in Blackboard.

This test is one way to measure practice computer programming skills. The test reflects that successful programmers like to solve problems, see patterns readily and pay attention to detail. Note that it is absolutely possible to increase skill in these areas through practice and experience. So, if you are unhappy with your score on the test, do not worry at all. The test is not an absolute measure and will not affect your grade in this course in any way. Students for whom English is not their first language may experience lower marks than reflects their real aptitude.

So, relax and enjoy!
