CST8110 - Introduction to Programming
Lab Exercise #7 – Another class

DUE: in your lab class during week of Nov 10th – 13th as appropriate

The submission for this exercise is due before you leave lab class.

Problem Description:
In this exercise, we will continue creating the classes we need to
write to complete Assignment #4. By the end of today's lab class, you
should have completed the BankAccount class as specified in Assignment
#4.

Once you have written the BankAccount.java class, then write a
Tester.java class to test your BankAccount class: a sample one is
given.

Submission Requirements:
- Demonstrate your working BankAccount class to your lab professor (by
  executing your test.java file)
- OR, if there is not enough time to do a demo, submit a printout of the
  source program containing the BankAccount class to your lab professor.
